

ADAM OTLEWSKI

HAND-DYED LEATHER COLORS

All leather components are individually cut natural cow hide and hand-dyed at the time of fabrication; some variance is to be expected in color and leather grain.

Ash

Graphite

Lead

Sable

Charcoal

Blush

Putty

Mustard

Gochujang

Tennis

METAL FINISHES

All metal finishes are hand-applied living finishes and will patina and change for the better with time. Slight variations in tone and appearance are to be expected.

Polished unlacquered brass (PUB)

Polished nickel plated brass (NPB)

"Smoke" acid patinated brass (SMK)

Dark patinated brass (DPB)

Matte blackened brass (MBB)

GOAT PARCHMENT

Goatskin parchment casts beautiful light and mimics the surface of the moon. Hides are natural and vary in texture and tone.

VEGAN / BIOFABRIC OPTIONS for 2022

Pencil

Iron

Rust

Italian plant-based Nubuck with a dense, scuba-like feel. Lined with recycled ultrasuede. Please inquire for availability and quote.

"Fruitleather" hand-made biofabric from the Netherlands. Made from waste mango reclaimed from shipping damage at the port of Rotterdam before being ground to a pulp and pressed to a smooth, natural finish. Lined with recycled ultrasuede. Please inquire for availability and quote.

ADAM OTLEWSKI

GOATSKIN PARCHMENT SHADE

Shades are made from genuine goatskin parchment, hand-selected for each lamp for its natural texture, pattern and color. Reminiscent of the lunar surface, its superior quality of light is unlike paper of any kind. Variations in pattern and texture are the be expected as each skin is unique.

All skins used are ethically sourced from a renowned artisanal workshop based in upstate New York, utilizing only hides from animals that died naturally or were raised for food. No toxic or carcinogenic chemicals are used in their traditional tanning and processing methods.

Parchment is a supremely historic material, its beautiful surface treasured over the centuries for bookbinding, manuscripts, and illuminations. Goatskin is susceptible to high humidity and may warp over time if stored out of a climate controlled environment.
