

Bastet Stool

Bastet Stool

The Bastet Stool is made from coopered ash, oak or walnut with a proud cushion rising from the base. The gently faceted frame embraces the upholstery, creating a deco inspired silhouette. The open facets on one side of the stool lift and visually suspend the seat in a sculptural play on negative space. All upholstery is provided by the customer at 1 yard per stool. The Bastet Stool is suitable for either commercial or residential projects. Please refer to the Materials Catalogue for all available finish options.
