

Satet Coffee Table

Satet Coffee Table

The Satet Coffee Table stands proudly on two coopered drums allowing the design to showcase the striking intricacy of the stone top which flows seamlessly across the revealed end grain rings. The geometry of the bases stand in contrast to the smooth contours of the marble which is held in suspension between the drums. Slender and bold, the Satet Coffee Table is a unique accent piece suitable for both commercial and residential use. Please refer to the Materials Catalogue for all available options.
